

Archer Engage™

Streamlining Risk Management Collaboration

Risk management is no longer confined to the role and responsibility of risk managers. Organizations increasingly rely on cross-functional teams and vendors to contribute key data in order to get complete picture of risk picture, to enable executives and boards of directors to seize the right opportunities.

Consider that:

- One of the top three risk management priorities for organizations in 2021 is improving cross functional risk response capabilities. (Gartner)
- Nearly 50 percent of board members believe the risk information they receive is insufficient for them to draw accurate conclusions. (National Association of Corporate Directors and Partners)
- Nearly half of organizations surveyed believe the financial impact of a failure by a third-party or subcontractor has at least doubled over the last five years, with a tenfold increase for one in five. That financial impact includes fines, direct compensation costs and lost revenue. (Deloitte)

This reinforces the need to significantly reduce complexity for third parties or business users who may only need to periodically provide information such as performing a scheduled assessment once each quarter, reporting incidents, or reviewing specific findings.

The Archer Engage Advantage

Archer Engage™ addresses the critical need for broad stakeholder participation in enterprise risk management. It extends the benefits of Archer beyond risk professionals, delivering a streamlined user experience for business users across the organization, executives and board members who are increasingly involved and interested in risk, and third parties required to provide input for risk programs.

Built upon previous development for gathering risk insights from vendors, Archer Engage enables Archer customers to implement an intuitive and focused user experience for risk analysis and treatment, with easy access to the required data, tools and context that requires no in-depth training. It drives simplified and efficient collection of risk data from key cross-functional stakeholders that is fed into the Archer platform for analysis and treatment.

Features

- Intuitive user experience for business users, vendors and executives.
- Mobile-optimized interface without the need to be connected to the corporate network.
- Focused access to the required data and tools with the appropriate context.
- Input feeds directly into main Archer implementation.

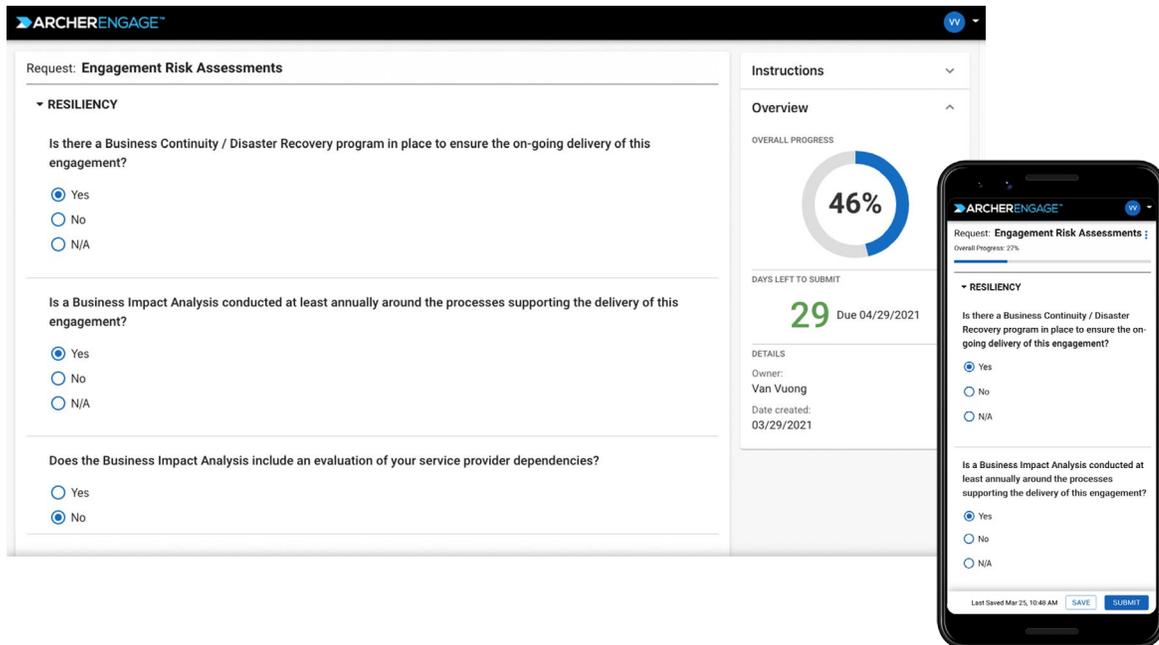

Benefits

- Broader risk management participation across the organization.
- Streamlined insights from business operations to risk management functions.
- More complete and accurate risk picture to support strategic business decisions.

Engage Your Business Users

Archer Engage enables business users to quickly and easily complete simple assessments or initiate risk activities such as identifying a risk or reporting an incident using a mobile-optimized interface on devices they own or at facilities they manage. Business users can quickly respond to audit requests and provide evidence. It gives risk professionals the ability to create ad hoc or scheduled requests using an easy to use form to collect data from everyone in the organization. Risk, compliance, and security teams can collect evidence from controls and perform control attestations or assessments.

Archer Engage enables business users to quickly and easily complete simple assessments or initiate risk activities.

Engage Your Vendors

Archer Engage facilitates collaboration between external vendors, business stakeholders, and risk managers throughout the governance lifecycle. Third parties can efficiently complete assessments, upload documentation, respond to issues and attest to performance, while reducing the burden for Archer administrators. Archer users can publish assessments with just the click of a button. Vendors can be automatically provisioned and can invite their peers to collaborate on assessments. When their work is complete, responses are automatically synchronized back into the Archer environment for review.

Engage Your Executives

Fueled by the appetite of senior executives for risk insights, many organizations are looking for enhanced risk visualization and quantification capabilities. According to a recent survey by the National Association of Corporate Directors and Partners (NACD), nearly 50% of board members believe the risk information they receive is insufficient for them to draw accurate conclusions. Future plans for Archer Engage include development of intuitive, mobile-optimized executive dashboards for members of the C-suite, providing the direct visibility and context needed to make risk-informed decisions.
